

# Leopold Thiao - CV

## Full Stack Web and Mobile Developer

## About

---

I am fast learner and always ready to improve or optimize my coding abilities to become an all-round better developer.

I develop the Frontend of Android & iOS apps professionally using Flutter. I prefer to build Web Applications using React Framework. I also code Python scripts & Machine Learning Projects to automate my personal life. I work hard and strive for efficiency by writing clean & fast code.

## Projects

---

### Frontend React Developer | AO Group (Remote)

Dec 2021 - Present

- Built a product website in Next.js with dynamic imports, SSR & Lighthouse optimizations.
- Built a storefront for the website that integrates with Stripe & Saleor.
- Used Moralis API to connect with Metamask & verify holders of NFTs.
- Built animating React components that work together with MUI components
- Built server-side dynamic price generation from cryptocurrencies to dollars.
- Built a Python script to track NFT sales, revenues & gas fees
- Made custom CRM modules using Odoo and Python
- Built a fully responsive web app with Next.js and TypeScript featuring Global state management & Google maps API with short deadlines

### Full stack React developer

- Built Fullstack React Applications for companies including Bikers Warehouse, Tu Jardin, Senghor-SA and others
- Built the backends using python, NodeJS and GraphQL
- Built the frontends using Next.js and Typescript
- Used Storybook to test my components and designed using Figma

### Frontend Flutter Developer | Develutions (Remote)

Aug 2020 – April 2020

- Worked in the an Agile environment using Jira and Bitbucket
- Created widgets, pages & logic using Stacked Architecture
- Built and deployed apps for testers using Firebase
- Worked with Firebase to work with the back end of the apps
- Coordinated with team project files with Git

### Frontend Web Developer | Senghor-SA

May 2018 – Jan 2020

- Built company websites and administration software in React and Flutter
- Provided translations of webpages and documents allowing for the company to market globally
- Lead decisions on software architecture and logic decisions

## Education

---

### Abbotts College Northcliff

- Achieved a final 42 Admission Point Score (equivalent to 4.0 GPA Internationally)
- Dux Scholar 2018 Award (1<sup>st</sup>)
- Top Academic Marks in 6 subjects including physical sciences, information technology and mathematics
- IT Olympiad 2018 – Gold Medal (Elite Division)
- Highest Total Effort Rating in Grade 12 during 2018
- Member of the student Representative Council

## Software Skills

---

### Languages

- JavaScript
- TypeScript
- Python 3
- CSS3 | SASS
- HTML 5
- Flutter | Dart
- SQL
- GraphQL

### Frameworks

- React.js
- Next.js
- Moralis
- PostgreSQL
- React Native
- Git
- Nodejs
- Saleor
- Firebase
- Stripe
- Odoo

### Styling

- Figma
- MUI
- Chakra UI
- Bootstrap
- Tailwinds

## Languages

---

- English – Fluent
- Polish – Native
- French – Fluent
- Spanish – Advanced
